EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech (ECE)	Sardar Vallabhbhai National Institute of technology, Surat	7.38	2022-2026
GSHSEB (12th)	Vithal Vidhyalaya School Vadodara	80	2020-2022

PROJECTS

Scalable ChatApp

March 2024

Architected a horizontally scalable chat service using WebSockets for real-time messaging across multiple stateless server instances to ensure high availability and scalability.

[GitHub](#)

- Employed Redis as a distributed cache layer and Apache Kafka for inter-server message brokering to handle large throughput and fail-over.
- User authentication, private/group chats, and message persistence with MongoDB database.
- Seamless load-balancing and automatic instance discovery with Kubernetes, supporting thousands of concurrent users.

Typo - Competitive Typing Platform

July 2024

Engineered a full-stack, real-time multiplayer typing game using Next.js, Node.js, Express, and MongoDB.

[Live](#) [GitHub](#)

- Implemented a robust backend with WebSockets (Socket.io), featuring a dynamic multi-queue matchmaking system for various game modes (e.g., time, words) and live opponent progress tracking.
- Developed a complete competitive framework including secure JWT authentication with OTP email verification, a skillbased ELO rating system, and deployed the application on Vercel and Render.

Movie Review Sentiment Analyser

June 2025

Built an LSTM-based Sentiment Analysis model

[Live](#) [GitHub](#)

- Built an LSTM-based deep learning model achieving F1 score of 0.8847 for binary classification of movie comments as positive or negative real-time predictions.
- Deployed sentiment analysis via a custom Android app, enabling users to analyze comments instantly with
- Exposed model as a REST API using Render, allowing external integration and testing(< 1s latency)

KEY COURSES TAKEN

Full Stack Web Development Course:- Completed via 100xDevs, covering frontend, backend, and deployment pipelines.

Data Structures and Algorithms:- Self-paced course on GeeksforGeeks, focused on problem-solving and competitive coding techniques.

SKILLS

Languages: C/C++, Java, Python, Javascript, Typescript, Go, MySQL

CS Fundamentals: Database Management Computer Networks (CN), Operating System (OS)

Software Principles: Object-Oriented Programming (OOPS), Containerization

Tools: Git/GitHub, Postgres, MongoDB, CI/CD pipeline, Apache Kafka, Apache Redis, Docker, Kubernetes, Apache Spark, Langchain

Frameworks: React, NextJs, Spring Boot, Express, Tensorflow

POSITIONS OF RESPONSIBILITY

MindBend: Served as Co-Head (2024) and Head (2025), worked on organizing teams, managed sponsorships, and contributed to the execution of technical and managerial events for 10,000+ participants.
